

FREELANCE POWERPOINT PRODUCTION

Native Office Studio

Native editable slides, disciplined file structure, and render-based QA.

EMAIL	darkstationsirsir1@gmail.com	AVAILABILITY	Project-based remote; paid test welcome
PORTFOLIO	Open portfolio	GITHUB	newhack-cpu

POSITIONING Production-focused support for deck cleanup, redesign, and image/PDF-to-editable reconstruction under a written scope.

What I can verify now

Native editing: Business text, shapes, tables, and standard charts are built as editable Office objects rather than flattened page screenshots.

Render-based QA: Deliverables are opened and rendered in Microsoft PowerPoint; compatibility is cross-checked in LibreOffice when appropriate.

Structured handoff: Consistent visual hierarchy, replaceable media assets, downloadable PPTX/PDF previews, and explicit scope boundaries.

Portfolio evidence

DELIVERABLE	VERIFIABLE DETAIL	PUBLIC EVIDENCE
PowerPoint	10 slides; 2 native charts; 1 native table	PPTX + PDF
Excel	7 worksheets; 2 native charts; formula checks	XLSX sample
Word	8 pages; real headings; fixed table geometry	Before/after PDFs

Engagement

Best starting point: a small paid test with a written page count, source-file format, turnaround, revision limit, and acceptance criteria.

TRANSPARENCY This profile does not claim fabricated clients, years of experience, reviews, orders, or commercial outcomes. Every public portfolio item is synthetic and labeled as such.
